

In the context of the growing need to address global warming and ensure equitable access to energy, **Colombia** emerges as a **potential leader in renewable energies**. With favorable policies and a clear commitment to decarbonization, the country is on a path of transformation toward more sustainable energy.

¿Who we are?

CERFER, established on November 8, 2021, by MINERGIA, AHK Colombia, and dena, is dedicated to developing Colombian talent for a **renewable energy future**. We focus on:

- 1 Creating synergies between the business sector, local communities, and government entities.
- 2 Driving technological transformation and training in renewable energies.
- 3 Offering practical and specialized training tailored to the needs of the sector.

Our Mision y Vision

Purpose Statement: We promote the energy supply of the future by building skills, networks and empowerment.

Mision: We are strengthening the German - Colombian cooperation within the framework of the Partnership for Climate and Just Energy Transition through practical training offers, technological innovations and the mutual exchange of experience.

Vision Statement: We are a reference center for the energy transition in Latin America to support employment, entrepreneurship and community development through know-how and technology transfer.

Our Differential Value

- 1 **Comprehensive Platform:** We contribute to a just and sustainable energy transition in Colombia.
- 2 **Connection and Cooperation:** We facilitate cooperation between Germany and Colombia, connecting companies and educational institutions.
- 3 **Training for the Future:** We offer comprehensive and flexible education tailored to the demands of the energy sector.
- 4 **Inclusive Opportunities:** We develop inclusive educational formats that benefit local communities and vulnerable groups.
- 5 **Reference Model:** We act as a leader in technology and knowledge transfer in Latin America.

Target

Local Communities: Includes indigenous, rural communities, and women committed to the energy transition.

Productive Sector: Companies seeking technical advice and consulting in renewable energies.

Educational Institutions: Partners in the design of academic programs and the organization of events on renewable energies.

Strategic Pillars

1

Empowerment:
Encourage active participation in the energy transition.

2

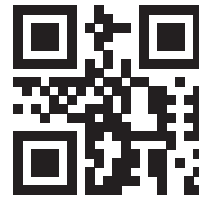

Education:
Offer training tailored to ecological and technological needs.

3

Enabling:
Promote the transfer of technologies and comprehensive solutions.
